CATÀLEG VALENCIÀ DE VARIETATS TRADICIONALS D'INTERÉS AGRARI

The Valencian Agrarian Diversity Plan

In 2016, the Valencian government initiated a plan for the recovery, use and *in situ* conservation of traditional horticultural varieties of agricultural interest, called "The Valencian Agrarian Diversity Plan". This initiative was born from the need to preserve the Valencian agricultural diversity in the cultivated fields and to disseminate its knowledge among farmers and consumers. The most important tool of this plan was the creation of a **seed transfer service** based on a catalogue, **The Valencian Catalogue of Traditional Varieties**, available not only for the professional agricultural sector but also for horticulture enthusiasts in general, whether in home gardens, social gardens, educational centres, associations, etc.

Crop	Local variety	Seed Production (g)	Seed Transfer (g)	Number of seed batches
Eggplant	Albergínia blanca	2968	1123	296
	Albergínia llistada de Gandia	2190	941	326
	Albergínia roja de Gandia	3313	1156	196
Cowpea	Bajoca de careta curta	9812	2882	110
Bean	Bajoca de ferradura	11 443	8690	270
	Bajoca mantega	6825	5940	194
	Bajoca roget	11 452	8810	257

Production and transfer of seeds from the Valencian catalogue of traditional varieties from January 2018 to June 2023

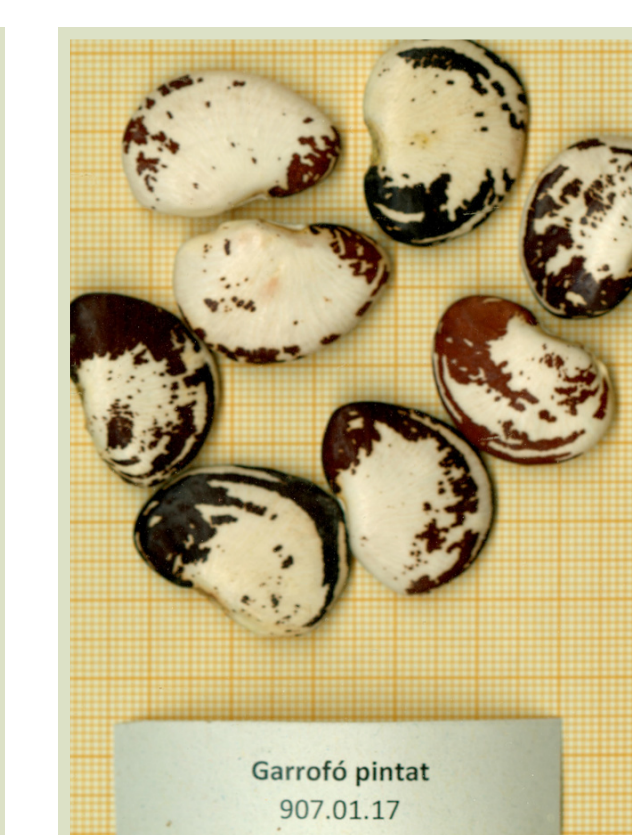

Seed production and conservation

The seeds transferred to the users are produced in accordance with **organic production standards** in the cultivation fields of the Agricultural Experimental Stations and of the CIEF and are characterized and analysed following **international protocols (ISTA standards)**, as well as subjected to controls and treatments to prevent the presence of pests. To make possible the conservation of the varieties and the supply of seeds, **two collections of seeds** were created, an active one, kept at 4°C and used to make the transfers, and a base collection, kept at -18°C to ensure long-term conservation.

The seed transfer service

The **seed transfer service** was put into operation in 2018 and in its more than 4 years of operation, more than **10 000 batches of seeds** have been served to a **total of 971 "guardians" in the field**, of which **68 are professional farmers** who also have contributed to the dissemination of the characteristics of these varieties to consumers. When receiving the seeds, the receptor must sign a **transfer agreement**, committing himself to **collaborate in the conservation** of the requested varieties and not to carry out lucrative activities with the transferred seeds. These transfers of seeds are made **free of charge**, at the official **agricultural experimentation centres (Carcaixent, Vila-Real or Elche) and at the CIEF**.

The Valencian Catalogue of Traditional Varieties

The Catalogue, available on the website of the Department of Agriculture, was presented in 2018 with the description of **45 traditional cultivars** belonging to **21 different crops**. The Catalogue aspires to be **participatory, dynamic and with projection to the future**. In fact, in 2024 the inclusion of **7 additional varieties** is planned and the inclusion of other varieties in the future is continually being considered.
